Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that Merchant failed to teach "a selector device coupled to a staging area to place said instruction in an optimal position within said replay loop." The examiner disagrees. Elements 154 and 150 are cited as the selector device because they select instructions to put back into the replay loop. Element 154 puts instructions into an optimal position by putting instructions on the fast replay track via staging queues E and F, as opposed to placing them in a longer delay replay queue. Thus, Merchant correctly reads upon the claimed limitation.
